

# Ontario Air Brake MELT

## Upgrade Course

Ontario class AZ drivers who have moved to BC and are applying for a class 1 licence may be required to take additional training for air brakes in BC if they have less than 24 months of consecutive class 1 experience from Ontario.

While drivers may have taken air brake training during the course of their MELT training in Ontario, it's not a mandatory requirement for class AZ drivers as part of the Ontario MELT Program.

The air brake system on a tractor-trailer vehicle is a fundamental component of the configuration and lack of knowledge on how this system works and how to check for proper brake adjustment poses a road safety risk for all road users, especially in difficult mountainous regions.

- 11.25 hours - air brake theory course
- 7 hours - practical training & certification
